- Neutralizes Dust Mites
- Antibacterial effect
- Attacks the root cause of odors
- Residual cleaning and deodorizing effect for up to 3 days
- Safe for people, pets and the environment

PACKAGING

200ml HDPE CONTAINER

DESCRIPTION

Good Night is a revolutionary approach to preventing allergy problems due dust mites. Through a completely harmless and microbiological action, dust mite allergens are neutralized from all textiles.

It has a residual cleaning and deodorizing effect, which lasts up to 3 days after use.

It is safe for all washable surfaces, skin and clothing. Safe for pets.

It is biodegradable, non-toxic and non-flammable based on FDA approved laboratory tests.

On a typical day, a human being will shed about 14 million skin particles, which become a source of food for microscopic creatures, called mites. While they live in many areas of our homes, beds and pillows are prime breeding grounds for these little critics. The waste they leave behind is incorporated into a protein which causes allergies that trigger allergic reactions in the sensitive ones (allergens). Probiotic bacteria consume waste from dust mites, dead skin, animal dandruff, perspiration and other organic substances that cause odors continuously throughout their lifespan is 72 hours. They compete with each new generation of dust mites for their common food source and exclude them competitively, strengthening control the probiotic environment with each application.

You now have an army to defend your immune system from the attacks of these irritating allergens.

Suitable for all kinds of textiles including: beds, pillows, curtains, carpets, furniture, pet bedding, garbage cans/areas, clothing, gym bags, sports shoes, and more.

This product is ideal for use on fabrics such as furniture, carpets, and surfaces that cannot be washed easily such as sports equipment, smelly shoes, and pet areas.

Good Night has been shown to be effective in removing dust mite allergens in beds.

DIRECTIONS FOR USE

Shake well before use.

Spray in desired areas once a day for a week and every 3 days thereafter, or as needed.

Suitable for all materials and surfaces.

Keep out of the reach of children.

CAUTION!

Store the product between 5 °C and 45 °C.
