PROBIOTIC CAR CLEANING

PROPERTIES

- **ANTIALERGIC**
- **PROBIOTIC INSIDE**
- **100% active, natural ingredient**
- **Completely clean air conditioning and ventilation system**
- **Actively acts on unpleasant odors**
- **Reduces the risk of allergens**
- **Effective and long-lasting effect (6 months / session)**
- **Extremely easy and fast to use**
- **Deep, microscopic cleaning**
- **For all vehicles**
- **Safe for all air conditioning systems**
- **Safe for humans, animals and the environment**

DESCRIPTION

PCC is a very effective airco cleaner working by means of 100% natural active ingredients, not only harmless to the cars interior, but also for you and all crew and passengers. The revolutionary PCC is the only airco cleaner on the market that does not fall under the biocide legislation because PCC is completely safe to humans, animals and the environment.

UNIQUE BIOLOGICAL PRODUCT

PCC is the first cleaner for airconditioning systems based on biodegradable components. The probiotics in the product are living good microorganisms that are of course fully biological.

ACTIVELY FIGHTS UNPLEASANT ODORS

Many bad odors in an airco system originate from organic compounds. The probiotics in PCC are capable to absorb such organic compounds and digest them, thereby actively reducing bad odors.

REDUCES ALLERGENS

Outdoor air contains a wide range of allergens that may enter and accumulate in the vessel's interior through the airco system. The probiotics in PCC are capable to digest a wide range of allergens thereby strongly lowering the risk of allergic reactions in the car.

100% NATURAL ACTIVE INGREDIENTS

The probiotics in PCC are of natural origing (soil and water) so that the action of the product is 100% thanks to natural active ingredients.

MICROSCOPIC DEEP AIRCO CLEANING

The probiotics in PCC are capable of degrading a wide variety of organic pollution in a fast and effective way. This renders all surfaces in the airco system completely clean. Because of their microscopic size, the probiotics can enter even the smallest places in the airco system to remove dirt from difficult to reach places.

EFFICIENT AND LONG LASTING ACTION

In contrast to chemical compounds that function only for few minutes, the probiotics in PCC remain active in the airco system for months. Applying PCC treatment twice a year is sufficient to enjoy a healthy and pure airco for a full year.

SAFE TO ALL AIRCO SYSTEMS AND INTERIORS

The composition of PCC is safe for all airco systems and interiors.

SAFE FOR HUMANS, ANIMALS AND THE ENVIRONMENT

When following the safety instructions of PCC, the product is completely safe to humans, animals and the environment. The probiotics are health and environment promoting substances. During the application, one should pay attention to not spray directly in the direction of a person or animal, because of the pressure in the can.

IMPORTANT

The machine works for 17 minutes.

In that time no one should be in the car.

The airconditioning must be on AIR RECIRCULATION at maximum fan speed, with the doors and windows closed
