

BIO AIR

ULTRASONIC GENERATED PROBIOTIC MIST

PROPERTIES

- Healthy microflora air.
- Active odour reduction.
- Fewer allergens.
- Less risk of airborne pathogens.
- Prevents biofilm.
- 100% natural active ingredient.
- 100% sustainable.
- PCB and VOC free

PACKAGING

200ml HDPE bottles

DESCRIPTION

BIO AIR is a probiotic product, enriched with prebiotics, for sustainable and safe air treatment, specifically for the small aperture of the BIO GO devices like the M20, M1, M11.

BIO AIR is an ultrasonically generated mist that carries the probiotics through the air.

The action of the product is based on the combination of surfactants and probiotics that produce enzymes for a long time. These enzymes break down organic dirt, whereby the dirt is separated from the substrate and brought into a dissolved or colloidal state and is easier to remove mechanically and / or physically.

This product stimulates a good microbiome.
This product can not be used as a biocide.

DIRECTIONS FOR USE

ALWAYS SHAKE THE PRODUCT BEFORE USE!!
Follow the instructions of the used ultrasonic mister.
Do not dilute the product with water!!

ATTENTION!

Store the products between 5°C and 45°C.

IMPORTANT

The packaging is not reusable and when finished, rinse and discard in accordance with the recycling laws in your country
